Seminar voices

„The Summer Academy started only 4 weeks before I went on vacation and therefore the timing was perfect. It made me realize that I do not necessarily want to be completely without my smartphone when I am on vacation. I also should work towards e-mail routines and a zero inbox. It is important to plan your return to work prior to the vacation. Some impulses were provided which I keep reflecting on.

„The seminar's structure and organization were very pleasant, as well as the extensive interaction with the participants. Providing the documents was also very helpful. Like this, it is possible to find instructions in retrospective on how to successfully relax during future vacations. In particular, I realized that I have to take care of myself and not regard the behavior of others as a standard or good example. I also liked the advice to set up an extended out-of-office notification because this provides some buffer time.

„I especially liked the video inputs and the individual examples. The course is merely about inspiration. I realized that there is no right or wrong, everybody needs a different kind of distance which in turn leads to different definitions of the term "stress-free." Better social media management should be a given in both our professional and private lives. I had already put many ideas from this course into practice before - and to get positive feedback to be on the right track is very valuable for me.

„I participated in the online seminar to learn about the opinion of others and to experience what is really meant by 'offline' and realized that there are or can be various stages of being offline during vacation; that there is a difference between vacation and summer break. I'm taking home many ideas and impulses from this seminar and will try out different things in my daily work routine.

„When I booked Judith Geiß' course “Gebrauchsanweisung für Amerikaner – endlich US-Kollegen verstehen und stressfrei mit ihnen zusammenarbeiten” (“Instructions on how to deal with Americans – finally understanding US colleagues and cooperating with them”), I first wanted an update for the financial language. I have been working with clients from the United States for years and have been able to use the detailed course materials to refresh my knowledge.”

„When I first booked Judith Geiß' course “Gebrauchsanweisung für Amerikaner – endlich US-Kollegen verstehen und stressfrei mit ihnen zusammenarbeiten” (“Instructions on how to deal with Americans – finally understanding US colleagues and cooperating with them”) I was initially curious. I wanted to sort my thoughts and see how many of my experiences matched those of others. Thanks to the course I was able to structure my thoughts in a better way and got some more input. My exchange with Ms Geiss was characterized by good communication and her pleasant character. Many thanks for this!
